## We Are Digital Signage.

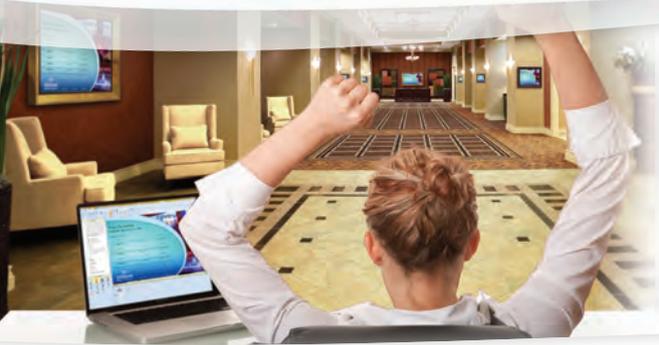

Total Solutions. When it comes to digital signage, it's what we do.

**ONE SYSTEM** supporting all components of your digital signage network and delivering a unified experience. **ONE CALL** is all it takes to handle everything you'll need, including sales, creative content, and technical support. Combining our experience with our dedication to intelligent innovation means **ENDLESS POSSIBILITIES** for you.

# It's what we do.

A voice of experience, integrity in innovation, and a true partnership approach in everything we do. That's who we are, and that transparency sets us apart. For almost 30 years, we at Morrow Technologies have helped thousands of customers as unique as you, use the JANUS Displays

product line as a strategic marketing tool to engage, communicate with, inform, and enhance the experience of your target audience. We help you capture their attention, give them ideas, and guide them. Your way.

## Software

Our powerful VIZIA software does the work for you. Manage and schedule content out to all the different displays in your digital signage network with ease! Edit content and include almost any media type in your digital signage template, through an easy drag-and-drop interface.

## Hardware

We take the "hard" out of hardware. Supply your own or purchase recommended hardware through us. The media controllers, displays, servers, and equipment we provide undergo thorough evaluations and testing, because we support what we sell over many years. We also offer consultation, configuration, and technical support.

## Content

Work one-on-one with our design team to develop amazing content for your displays. JANUS Displays content includes motion, animations, and video; the opportunities are infinite. Choose custom or standard template themes, all created and designed just for you.

## Support

Receive support when you want it, and get answers when you need them. You will always be greeted by one of our helpful US-based product specialists, who handles both software and hardware questions without redirection. JANUS Displays customers receive their first year of service free of charge, with optional service packages thereafter.

## Frames & Enclosures

Imagine a frame serving a greater purpose than just stunning good looks. We offer enclosures that are beautifully crafted to complement your decor, and showcase eye-catching content designed just for you. Behind the scenes, they provide ventilation, hide display bezels, expose power buttons, and make it easy to access media controllers.

## Wayfinding

**Help them find their way.**

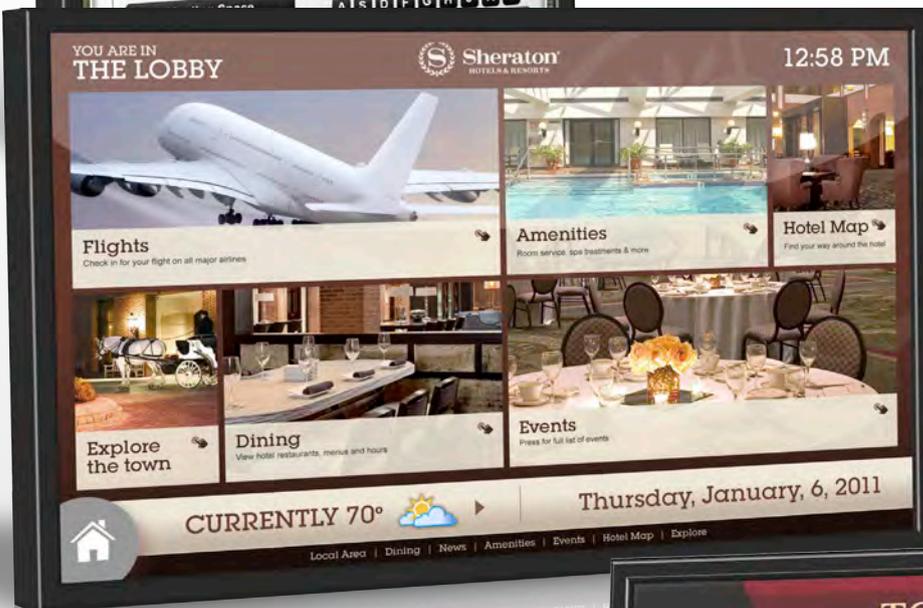

Confidently guide your visitors and guests through your property with JANUS Displays mapping and wayfinding, tailored specifically to your property. Show start and end points, draw the path, and provide directions. Send the directions to phones using email or an interactive mobile solution!

## Mobile

**Powerful, portable, and readily available.**

With just the simple scan of a barcode using any smart phone or tablet, all your digital signage information will be available and ready on the go. The power of a concierge board is now in the palm of your hands.

## Events

**Timing is everything.**

By interfacing with your event management software, your digital signage system will always display relevant and up-to-date information. It will automatically update your entire digital display network whenever a change is made.

## Flight & Boarding Pass Stations

**The sky is the limit.**

Allow your guests the convenience to check their flight status, check in, and print their boarding pass without ever leaving your lobby. Give them more time to enjoy your amenities or tour your beautiful property.

## Dining Menus

**The ingredient to success.**

Retire your old menu board and showcase your best dishes, newly added items, and your award-winning menu, in a fun and eye-catching way. Replace your traditional menu boards with easily updated menu changes and digital content that is as decadent as your menu.

## Emergency Messaging

**Help keep your property, staff, and guests safe and informed.**

Effectively communicate emergency messages through your display. With the simple click of a button, show pre-programmed messages, maps, alerts and emergency instructions throughout your property.

## Advertising

**Put your message where the money is and drive revenue by driving traffic.**

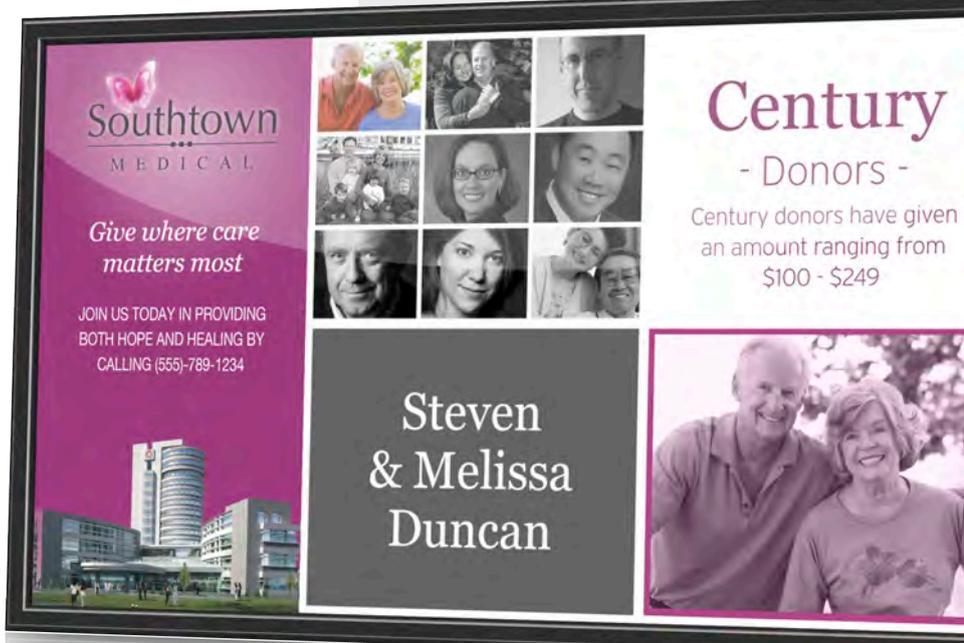

Use your digital signage system to work hard on your ROI by charging local restaurants, shops, and attractions for the traffic you send their way.

Solutions

## Donor Boards

**Honor those who have contributed to your success.**

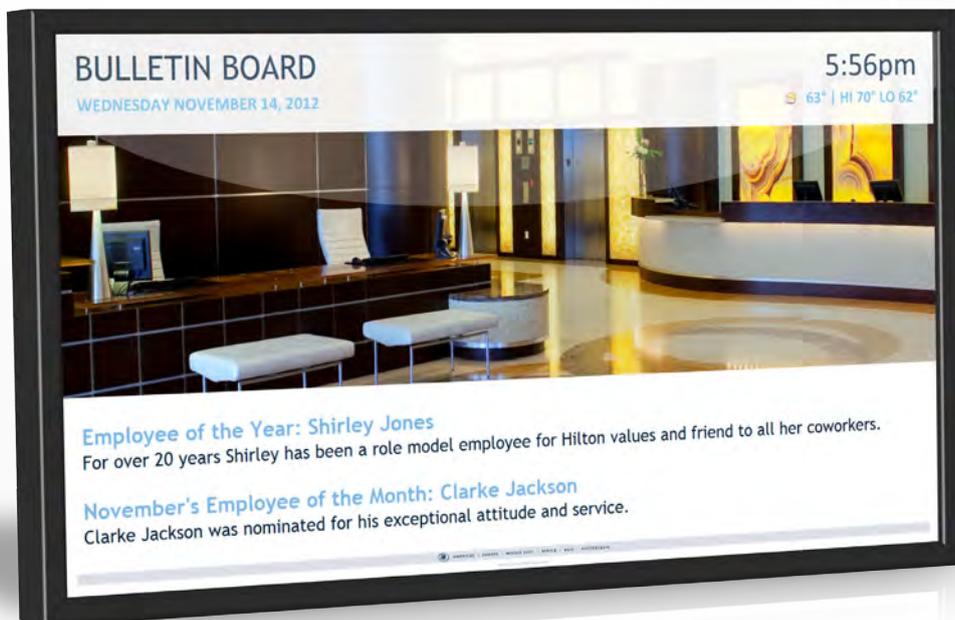

Imagine the reaction you will get when your donors see their names, picture and information displayed proudly in your lobby or common area on a large digital display.

## Announcements

**Need a digital bulletin board?**

Move away from dated, passive announcements, to an engaging, interactive media experience. JANUS Displays can take the place of traditional bulletin board announcements and paper fliers, and provide a quick and easy way to display announcements, news and information.

## Outdoor

**Overcome the elements and take advantage of outdoor communications.**

Strategically placed by the entrance of your building, or close to busy streets to help draw attention, an outdoor display is perfect for creating buzz before entering the premises. Enclosures are specifically designed to protect against water, dirt, tampering, theft and harsh temperatures.

## Directories & Listings

**Guide and direct guests with JANUS Displays directory listings.**

Event directories, physician directories and building directories are just a few ways you can help enhance your guests' experience. Show meeting times, office locations, daily events and more!

## Art & Architecture

**Animate your interior and bring your décor to life.**

Say good-bye to dusty frames and old paintings, and incorporate unique, eclectic digital art into your property. Dazzle passersby with color and animation, created specifically for you with custom content and video.

## Weather & Time

**Rain boots or swimsuits?**

Let your guests know early with weather and time on a JANUS Displays digital signage system. Whether you prefer a one, three or five day forecast, input any zip code to view current temperatures and weather conditions at other property locations and destinations.

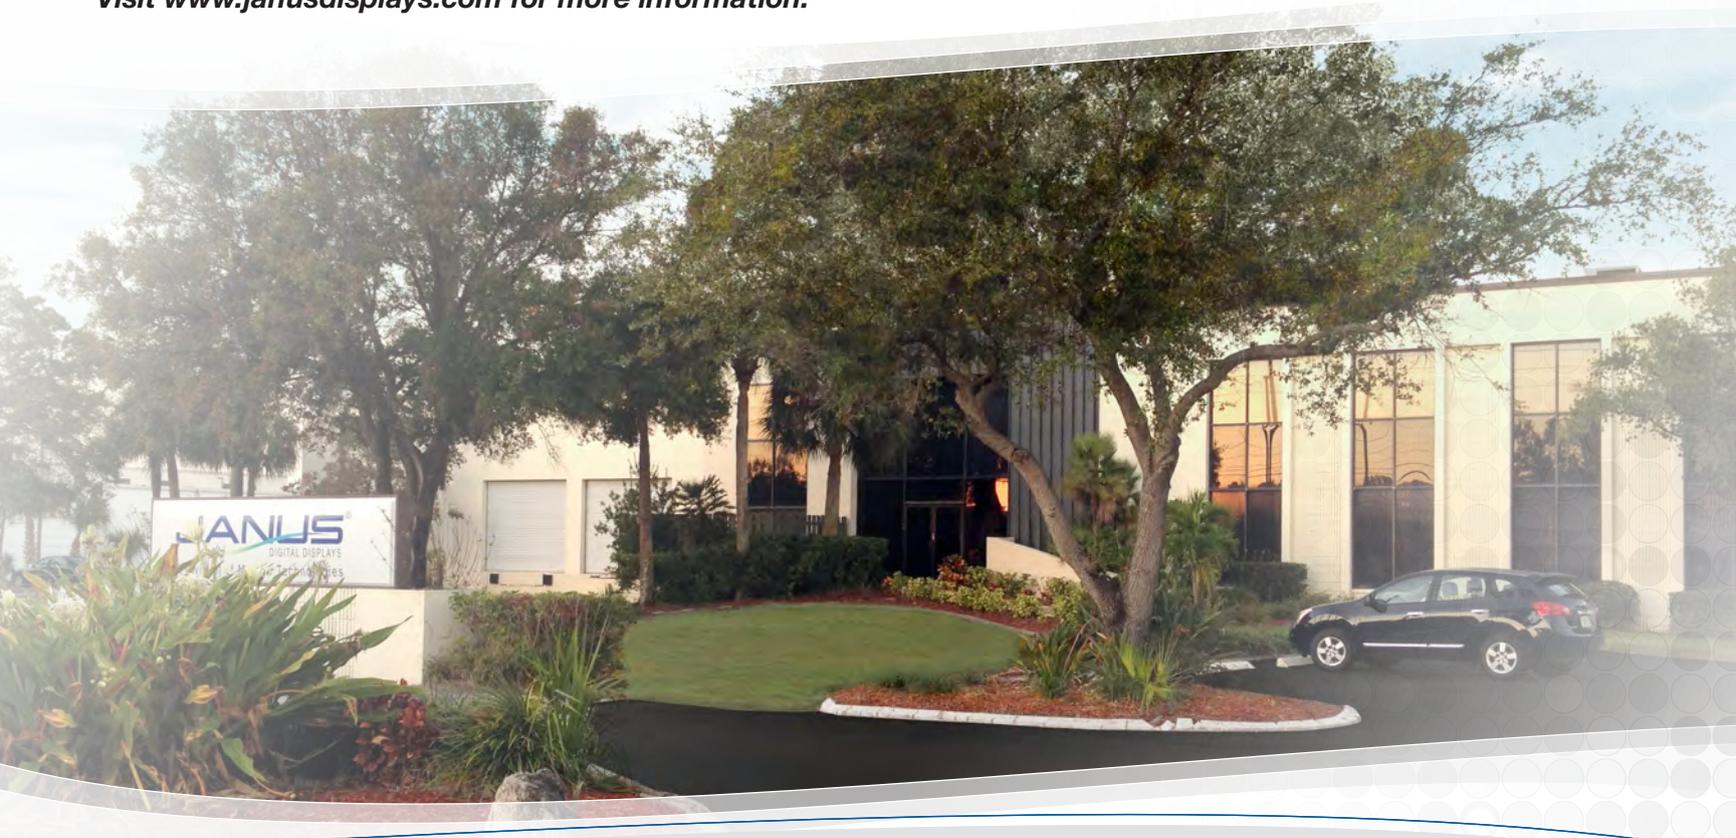

## About Morrow Technologies

Since 1984, Morrow Technologies has been delivering innovative digital signage experiences. The flagship JANUS Displays product line is designed to inform and delight guests and visitors at hotels, hospitals, military bases, universities, casinos, and more.

JANUS Displays offers management the ability to strengthen communication and engagement with guests through animated, interactive displays of event listings, wayfinding, local maps, weather, dining reservations, flight status / check in, menu boards, advertising, directories, emergency messaging, and more.

The JANUS Displays product line includes interactive touchscreens, non-interactive displays, room boards, in-room communications, and video walls. Morrow Technologies provides full service signage offerings, including software, hardware, content, support, and enclosures. The company reaches millions of people daily through its 15,000+ installed networks.
